

On 23.08.2019 the director of AMIRANDA Ltd A. Miroshnichenko took part in training carried out by the international certifying company SGS Ukraine. The training concerned the relevant matter of certification of sustainable biofuel production according to the standards REDcert.

REDcert certification is based on the requirements of Directive No2009/28/EC of European Parliament and of the Council dd. 23.04.2009 on the promotion of the use of energy from renewable sources.

Fulfilment of the requirements of this Directive stimulates application of the ecological methods of biomass and biofuels production to protect soil, water and air contamination, assists in shortening of greenhouse gas emissions, preservation of natural biodiversity, ensuring safe working conditions and guaranteeing the rights of workers.
